THEMATIC FIELDS

Crop Sciences

cereals; fodder plants; industrial plants; plant breeding and seed production; plant protection, organic production; genetic resources; land and water management; etc.

Horticulture

fruit growing; viticulture and enology; vegetable growing; medical and aromatic plants; decorative plants; plant breeding and nursery production; plant protection; organic production; genetic resources; etc.

Animal Sciences

livestock breeding; aquaculture; apiculture; animal nutrition; animal breeding; hunting; veterinary sciences; organic production; genetic resources; etc.

Agricultural Economics and Rural Development

agricultural policy; agricultural economics; marketing; agromanagement; agricultural financing and insurance; rural and regional development; food self-sufficiency, climate change adaptation; etc.

ABSTRACT OR PAPER SUBMISSION

The deadline for abstract submission is the 1st of March 2022. It can be done on-line via AgroReS Symposium web page – <https://agrores.net/en/participation/registration/>

More information on the web page www.agrores.net

PUBLICATION

All accepted abstracts will be published in the Book of Abstracts, before the Symposium.

Authors who decide to publish a full paper can do it in two ways:

1. In the Proceedings of the Symposium (by assigned ISBN and CIP number) or
2. In the scientific "Agro-knowledge Journal" published by the Faculty of Agriculture, University of Banja Luka (more on the journal's website <http://doisrpska.nub.rs/index.php/agroznanje>).

REGISTRATION FEE

Symposium participants	100 € (200 KM)
Students	40 € (80 KM)
Accompanying persons	40 € (80 KM)

The registration fee includes:

- Electronic copies of Book of Abstracts and Proceedings of the Symposium AgroReS 2022;
- Electronic copies of the Agro-knowledge Journal;
- Welcome cocktail and cultural evening (26th of May);
- Refreshment during breaks;
- Gala dinner (27th of May);
- Field visit and sightseeing tour (28th of May).

At least one registration fee must be paid for each presented or published abstract/paper. The registration fee can be paid in advance through the bank transfer or on the spot in cash. The Symposium participants cover the remaining costs of participation, that are not included in the registration fee.

Prizes will be awarded for the best student oral and poster presentations.

IMPORTANT DATES

KEYNOTE SPEAKERS

Carlo Leifert - Southern Cross University, Lismore, Australia

Integrated soil, crop and livestock management in organic agriculture; a logical framework to ensure food security and human health?

Prior to taking up his position Carlo was Professor of Ecological Agriculture at Newcastle University for 17 years. His work over the last 20 years has focused on: applied agronomic R&D and technology transfer to improve quality and safety and reduce costs in sustainable and organic food production systems, strategic R&D into interactions between food production methods and food quality (especially nutritional and sensory quality) and safety characteristics and selection/breeding of crop and livestock varieties suitable for “low input” and organic production systems.

Manuel Mota - University of Evora, Portugal

Plant parasitic nematodes, from soil to top of plant: a challenge for our time

A major scientific achievement of Manuel Mota was his detection, first in the EU, of the pinewood nematode, *B. xylophilus*. He has subsequently pursued a steady line of research on the physiology and the processes involved in plant disease induced by this nematode. He has contributed to the pest risk analysis for the territories of the European Union on *B. xylophilus* and its vectors. His recent interests include entomopathogenic nematodes, root lesion nematodes (*Pratylenchus* spp.) and longidorid virus-vector nematodes.

Milan Miroslavljević - Institute of Field and Vegetable Crops, Novi Sad, Serbia

Changes in physiological and quality traits related with breeding progress

Milan Miroslavljević is the coordinator of small grains genetics and breeding at the Institute of Field and Vegetable Crops. His research has focused on plant genetics and breeding and development of crop cultivars including triticale, durum and bread wheat. His recent activities are devoted to the crop physiological mechanisms related to cereal breeding. He is an author and co-author of more than 25 cultivars of small grains and a leader and member of several national and international projects dealing with small grains breeding and genetic resources

Zoran Popovski - Faculty of Agriculture and Food Sciences, Skopje, North Macedonia

Further challenges of genetic modification in agriculture

The main fields of his scientific interest are application of molecular markers in selection and production of recombinant proteins. He spent few years as researcher and professor at Osaka Prefecture University in Japan, Univesitta dellaTuscia in Italy, University of Sarajevo in Bosnia and Herzegovina, INRA – Nantes in France, Lund University in Sweden, Ohio State University and Case Western Reserve University in USA. Currently, he is a visiting professor at the Faculty of Biology and Technology at the Novosibirsk State Agrarian University.

Felix Arion - University of Agricultural Sciences and Veterinary Medicine Cluj-Napoca and AgrioTransilvania Cluster, Romania

Doing agribusiness in a competitive environment

Felix Arion is economist specialised in agricultural and rural management and rural development strategies, General Director of AgroTransilvania Cluster (Gold labelled cluster) and, the Head of Department of Economic Sciences. Obtained a joint PhD at UASVM Cluj-Napoca in consulting the agricultural and rural companies. It has been involved into 21 international research (EU funds, World Bank funds) and development projects (Leonardo da Vinci, ERASMUS, IP), 2 of them as project manager and for 12 as institutional coordinator with a wide range of partners from Europe, USA.
